

Practical Project

Deadline: Wednesday 22\4\2012 2.00 PM

Discussion: Week # 14 (Sunday, 29\4\2012 – From 12:30 – 2:20)

For each group, do the following using the previously submitted database:

Part One (Oracle Forms):

1. Create a data-block form for each table on your database. Use both
2. Create a master-detail form for any two related tables.
3. Define a business process scenario and create a custom form that reflects it.

Your Forms should include:

1. Sequences (for at least 3 PKs)
2. LOV (for at least 2 FKs)
3. Control items:
 - Command buttons (for at least two forms)
 - Radio buttons or check boxes (for at least one form)
4. Logo image for your project

Part Two (Oracle Reports):

1. Create 3 different reports using different styles.
2. Create a master-detail report for any two related tables.

Your report should:

- Use one of the predefined templates.
- At least one report must use both paper and Web layout.

Submission

You should submit both soft and hard copy of your work.

- The hard copy should contain a screen shot of all the forms and reports included.
- The soft copy should include all your forms and reports files (.fmb and .rfd files) along with any other related files including your SQL scripts.
